To whom it may concern:

Re: Letter of Reference

Chip Harper has provided structural drafting support on a large variety of projects I am familiar with over the past five years. These projects have included churches, jails, multistory commercial structures, single family and multifamily residential units, and specialty foundations. Drafting services provided have included foundation plans, floor framing plans, roof framing plans, structural sections and details, and structural notes. His work has always been performed in a timely, knowledgeable, and professional manner. His expertise with AutoCAD is supplemented by his collection of industry specific AutoLISP routines, AutoCAD block libraries, and his reference library of technical manuals and manufacturers' catalogs. I highly recommend his services.
